

CS 460W Hospital Database Project

Meeting 2

Thursday, February 3, 2022 9:55 am - 11:10 am | In-person Dana Room 318

Minute Taker	Alana Ceden0 (AC) <acedeno@hartford.edu>
Attendees	Daniel Mathieu (DM) <DMATHIEU@hartford.edu>, Georenz Koo (GK) <GKOO@hartford.edu>
About this meeting	Second Group Meeting

	Type	Note	Owner	Due
1. General	INFO	Google Doc draft was completed		
1.1	INFO	Discuss whether to change IDE. This is due to find an IDE that makes it easier to create a GUI (drag and drop blocks and then code the functions)		
1.2	INFO	Alana sent three login examples (Epic and My Chart) that may be used as an idea on how the GUI will be designed.		
1.3	INFO	Daniel was researching ways to create a GUI using VSCODE. Unfortunately, there wasn't a drag-and-drop GUI designer.		
1.4	INFO	Georenz found that with NetBeans, we can use Java Swing to drag and drop the blocks and be able to code the functions.		
1.5	INFO	Alana sent links through Discord. These links will be helpful when becoming familiar with NetBeans and Java Swing and knowing how to use them.		
1.6	INFO	Alana created a Github repository where any progress such as code and project deliverables may be added for ease of access. This repository was shared with the other team members. The link to the repository is: https://github.com/A-Cedeno/Hospital-Database-Projectx		
2. Current Tasks	TODO	Research ways to connect a database to Apache NetBeans IDE	AC, DM, GK	
2.1	TODO	Update Google Doc draft.	AC, DM, GK	
2.2	TODO	Create a working login	AC	
2.3	TODO	Research SQL	DM
